Globo Family & Trust GmbH, an integral part of Globo Consulting Group, is a Swiss based Trust Company providing high net worth individuals and families with sophisticated and long lasting wealth-planning solutions.

Capital preservation matters. When family wealth has become substantial and complex to manage, when it takes up too much of your time or when it has exceeded your knowledge to manage it yourself, it may be the time to setup a family office. The family office will be your single point of contact, will support you with a broad range of financial and legal issues and will represent the family in numerous situations in the outside world.

Our selected group of families take advantage of state-of-the-art wealth planning tools, always applied in a legal and tax-complaint environment, thus ensuring high levels of asset protection, optimised returns and efficient intragenerational wealth transfer.

Globo Fund Solutions is GLOBO CONSULTING GROUP'S unit specialising in designing and implementing alternative investment funds. Each fund to be implemented has its particular features, depending on the type of investors, the type of asset(s) to be invested in and the objective sought.

Alternative investment funds can be structured to consolidate family wealth, taking into account the different types of assets, levels of risk aversion and investment horizon among the family members.

They can also be structured to generate the highest level of asset protection, or to plan and hold private equity investments in international companies.

Whatever the purpose, structuring via alternative investment funds provides access to a world of flexibility, security and efficiency typical of the fund industry.

Globo Business Connexions is a virtual platform that brokers the international purchase and sale of operating businesses. These businesses are segregated by geographic location, business area, investment amount and business profile. Globo Business Connexions' goal is to simplify the process when seeking an investment beyond national borders.

At Globo Business Connexions we carefully verify and validate that the financial information of the businesses posted on the platform has been properly analyzed to concur with the corresponding present value of the investment.

We complement the brokerage services with the immigration solution. Globo Business Connexions assists in obtaining temporary or permanent residence permits for individuals and their family members taking over of businesses promoted on the platform, which is usually simplified when a large investment is involved.
